Investment objectives

- I wish to invest for:
- Capital Growth
(your main objective is growth in the value of your capital; there is no specific income requirement)
- Income
(you require a flow of dividend income or interest; growth of capital is a secondary consideration)
- A Balance between growth and income
(you seek to achieve a mix between generating capital growth and producing an income)

What is the long term purpose of this investment?

Attitude to risk

There are inherent risks associated with investing. In certain circumstances both capital values and income can fall.

I confirm I have read and understand 'Risk & Diversification' and define my attitude to risk as:

Attitude to risk	Farley & Thompson description	Please tick
Very Low risk	Investments include cash accounts, NS&I and UK sovereign debt (Gilts).	N/A
Low/Medium risk	Investments in this category comprise sovereign debt (gilts) and investment grade corporate bonds, bond funds and gilt funds. To a lesser extent more volatile assets such as broadly-based UK and global equity collectives may be recommended in limited proportions but <u>no direct equity</u> shareholdings. These investments are likely to produce a predictable level of income but will not offer much prospect for capital growth.	Inc COLLS
Medium risk	Investments in this category will include those in the Low/Medium risk group but proportionately will have a higher content of more volatile equity-based assets but are <u>unlikely to include direct equity</u> shareholdings. Collective investment recommendations in the Medium risk category may also include those with a broad thematic objective. These investments combined have the potential for both income generation and capital growth.	Inc/Bal COLLS
Upper Medium risk	Investments in this category may include those in the Low/Medium and Medium risk groups but recommendations are likely to have a greater focus on more volatile equity-based assets, particularly direct equity shareholdings in FTSE100 and 250 companies. Collective investment recommendations may include those with more specialised or narrow-ranging remits. These investments combined have the potential for generating capital growth with some income.	Bal or Gro
Medium/High risk	Investments in this category may include all those in the Low/Medium, Medium and Upper Medium risk groups with an emphasis on a broader spectrum of investments. There is likely to be a significant focus on the most volatile assets, including FTSE100 and 250 direct equity holdings and to a more limited extent, individual smaller company or Alternative Investment Market (AIM) shares. Recommendations may also include less liquid and narrowly-based thematic or single country funds. These investments combined have the potential for capital growth with limited prospects for income. High risk	Investments include warrants, derivatives, futures and options as well as EIS, Venture Capital Trusts, emerging market and frontier single country funds.	Gro
